

Letter Case

SOPHIA with *C. Morali*

This collection is the result of the collaboration of the well known Greek ceramic artist, **Christina Morali** with Sophia.

Inspired by the Greek letters that are not found in the English vocabulary, such as Ψ (psi), Θ (theta) and Ω (omega), we created the collection "Letter Case".

Even if those three Greek letters are not found in the English alphabet, they are commonly used in the scientific world.

For example, the letter Ψ (psi) is used in physics and more specifically in quantum mechanics. Ω (omega) is found in mathematics, chemistry and physics. The letter Θ (theta) represents plane angle in geometry.
